

[Teamviewer Getintopc](#)

The screenshot shows the TeamViewer interface. At the top, there is a blue navigation bar with the text "Connection Extras Help" on the left and a circular icon with two arrows on the right. Below this, there are two main tabs: "Remote Control" (with a double-headed arrow icon) and "Meeting" (with a group of three people icon). Underneath the tabs, it says "Free license (non-commercial use only) - User".

There are two main panels. The left panel is titled "Allow Remote Control" and contains the text "Please tell your partner the following ID and password if you would like to allow remote control." It has two input fields: "Your ID" and "Password". The "Password" field contains the number "4687". Below this is a section for "Enter a personal password to access this computer from anywhere." with an empty input field and a pencil icon.

The right panel is titled "Control Remote Computer" and contains the text "Please enter your partner's ID in order to control the remote computer." It has a "Partner ID" dropdown menu, two radio buttons for "Remote control" (selected) and "File transfer", and a blue "Connect to partner" button.

At the bottom left, there is a grey overlay with the text "GET INTO PC" in large letters, "Ready to connect (secure connection)" below it, and "Download Free Your Desired App" at the bottom. At the bottom right, there is a "Computers & Contacts" section with a person icon and a right-pointing arrow.
